## Thank you!

Shetland Amenity Trust are the lead organisation in the delivery of Peerie Boat Week, contributing financially, and with provision of the main venue and key staff. Volunteers also play a vital role in the delivery of the event programme and are a valuable part of the team. This includes those who train all summer learning to sail the Vaila Mae, and those who help with event delivery over the weekend.

Serco NorthLink Ferries operate the lifeline ferry service between Shetland and the Scottish Mainland on a daily basis and support many local community teams and events.

# Welcome to Peerie Boat Week 2018

Shetland Amenity Trust remains committed to celebrating Shetland's maritime heritage. While the full Shetland Boat Week event is taking a break this year, Peerie Boat Week is taking the successful format of this festival and delivering a more concentrated series of events and activities over the weekend of 17th to 19th August. The Trust are keen to retain the spirit of the past year's event and evaluate the most effective way to develop the festival for the future.

Peerie Boat Week remains a family friendly event, facilitating access to a range of nautical themed activities for all ages. Talks, tours, demonstrations, boat trips and workshops are all on offer with a variety of different providers. The main hub of activity remains at Hay's Dock and Shetland Museum and Archives, with things to see and do each day from Saturday 12th to Sunday 19th August.

Full programme details are included in this publication, kindly sponsored by Serco NorthLink Ferries, and tickets can be purchased, where required, from [www.thelittleboxoffice.com/smaa](http://www.thelittleboxoffice.com/smaa), Many events are free, with no booking required. A lifetime's protection for just one low cost with NO monthly charges or fees. Suitable for all type of outboard motors.

### Why fit Datatag?

Thousands of outboard motors are stolen each year, and thieves often cause serious damage to boats in the process. Exclusive to Suzuki, the Datatag electronic identification system is designed to act as both a deterrent against theft and as a powerful way to aid in the recovery in the event of a theft.

### What does it do?

Installation of the Datatag security technologies gives the Suzuki outboard motor a unique "fingerprint" that can be established, by the police or the insurance industry, in a number of different ways. The unique identity is virtually impossible to remove, however hard a criminal may try.
